

Match or **double** your interest earned for more lifetime income

Power Index Advisory® Index Annuity

Lifetime Income
Plus Multiplier Flex®

Not FDIC or NCUA/NCUSIF Insured

May Lose Value • No Bank or Credit Union Guarantee
Not a Deposit • Not Insured by any Federal Government Agency

Index annuities are issued by American General Life Insurance Company (AGL). Guarantees are backed by the claims-paying ability of AGL.
Not available in New York.

Multiply your retirement income

The Power Index Advisory Index Annuity is an accumulation and income solution designed for retirement planning. It can help grow your assets, based partly on the performance of an index, while protecting your principal against market downturns. It also offers lifetime income through annuitization for no cost or through a feature known as a guaranteed living benefit (GLB) rider for an annual fee.

Power Index Advisory with the

Lifetime Income Plus Multiplier Flex GLB rider offers you the opportunity to:

MATCH

Your interest earned for more income now

Your annual income credits **MATCH (x1)** the rate of interest earned in the annuity (if any) after activation.¹

DOUBLE

Your interest earned for more income later

Your annual income credits are equal to **DOUBLE (x2)** the rate of interest earned (if any) prior to activation.²

ADD

Income and coverage flexibility

You can adjust coverage and take pre-activation withdrawals without eliminating key guarantees.³

The above hypothetical examples assume an interest credited rate of 5%. Interest earned will never be less than zero in flat or down markets. See back cover for Key Terms and Definitions and more information about the Power Index Advisory Index Annuity.

¹Lifetime Income Plus Multiplier Flex is available at contract issue for an annual fee of 1.0% of the Income Base. The Income Base is the amount on which lifetime withdrawals are based. Annual income credits are added to your Income Base, not your contract value, and are equal to 100% of the interest rate earned in the annuity after activation (the decision to begin lifetime withdrawals under the GLB rider). Lifetime Income Plus Multiplier Flex may not be available in all states or firms.

²Annual income credits are equal to 200% of the interest rate earned in the annuity before activating the rider and lifetime withdrawals begin.

³Pre-activation withdrawals will not eliminate the doubling feature or lock in your withdrawal rate for life, but they will proportionately reduce your Income Base and Income Credit Base.

See how your income can grow, even as you're taking income

With Lifetime Income Plus Multiplier Flex, you can benefit from rising income, even after lifetime withdrawals begin. Annual income credits match (x1) the interest earned and can last until the earlier of age 95 or the depletion of your contract value. As the hypothetical example below shows, this income is guaranteed for life, even if your account value drops to zero!

INCOME NOW

Match (x1) your interest earned (if any) after starting lifetime income

Hypothetical example assumptions: \$100,000 premium, issue age 65 and activation of the GLB rider with 7.00% withdrawals (single life) beginning immediately in year 1

Age	Interest Credited Rate ⁴	Match (x1) the Interest Earned	Annual Income Credit	Income Base	Account Value	Withdrawal Taken
65	–	–	–	\$100,000	\$93,000	\$7,000
66	2.52%	2.52% x 1 =	2.52%	102,520	87,142	7,176
67	5.00%	5.00% x 1 =	5.00%	107,646	82,887	7,535
68	0.00%	N/A	0.00%	107,646	74,276	7,535
69	4.44%	4.44% x 1 =	4.44%	112,425	68,580	7,870
70	2.34%	2.34% x 1 =	2.34%	115,056	60,980	8,054
71	5.00%	5.00% x 1 =	5.00%	120,809	54,364	8,457

85	–	N/A	–	147,746	–	10,342
	3.32% Avg. Annual ⁵		3.32% Avg. Annual ⁵			\$192,278 Total

Upside Potential

You'll get an income "raise" if the market is up, even if your contract value is declining!

- Match the interest earned
- No income credit in flat or down years (or if contract value has been depleted)

Note: Rates are as of April 15, 2024 and subject to change at any time. Please scan the Quick Response (QR) code on page 5 or [click this link](#) to see current rates.

The examples on these pages are hypothetical and do not represent actual cases. They are intended only to show how Lifetime Income Plus Multiplier Flex can work. See Key Terms and Definitions on back cover for more information.

Double your interest earned while saving for retirement

If you wait to begin activation, your retirement income can grow even faster. Prior to activation, Lifetime Income Plus Multiplier Flex offers annual income credits that are equal to double (x2) the interest earned. Keep in mind, once lifetime withdrawals begin, you will no longer be able to increase your retirement income by double the rate of interest earned.

**INCOME
LATER**

Earn 2x the interest before taking income and 1x the interest after income begins

Hypothetical example assumptions: \$100,000 premium, issue age 60 and activation of the GLB rider at age 65 with 7.00% withdrawals (single life)

Age	Interest Credited Rate ⁴	Double (x2) and Match (x1)	Annual Income Credit	Income Base	Account Value	Withdrawal Taken
60	–	–	–	\$100,000	\$100,000	–
61	2.52%	2.52% x 2 =	5.04%	105,040	101,470	–
62	5.00%	5.00% x 2 =	10.00%	115,040	105,393	–

"Paycheck" for Life

Your income is guaranteed, even if your contract value goes to zero, provided lifetime withdrawals are taken within the terms of the rider

- Double the interest earned
- Match the interest earned
- No income credit in flat or down years (or if contract value has been depleted)

Note: Rates are as of April 15, 2024 and subject to change at any time. Please scan the QR code on page 5 or [click this link](#) to see current rates.

See Key Terms and Definitions on back cover for more information.

Guarantee lifetime withdrawals of up to 8.05% per year

With Lifetime Income Plus Multiplier Flex, you can take out up to 8.05% per year for life, depending on your age at the time of the first lifetime withdrawal and whether one or two people are covered (see table below).

You also have the:

Flexibility to take withdrawals prior to activating the rider

without eliminating the doubling feature or locking in your withdrawal rate for life.⁶

Ability to change the number of individuals protected under the rider

(Single or Joint Life) to help meet varying income needs, or to address life events like marriage, divorce or death of a spouse.⁷

Confidence of knowing that your income will not decline

for the life of the contract, as long as withdrawals don't exceed the annual limit.

The longer you wait to start income, the more you can take out for life

Maximum annual withdrawal percentage once Lifetime Income Plus Multiplier Flex is activated.

Shown as a percentage of the Income Base.

Age of Covered Person(s) at First Lifetime Withdrawal ⁸	One Covered Person (Single Life)	Two Covered Person (Joint Life)
75 and older	8.05%	7.55%
72 to 74	7.60%	7.10%
70 to 71	7.40%	6.90%
65 to 69	7.00%	6.50%
60 to 64	6.40%	5.90%
50 to 59	5.90%	5.40%

Action is everything. Talk to your financial professional or agent today for more information.

Excess withdrawals may reduce future income and benefits. See Key Terms and Definitions on back cover for more information.

⁴Interest credited rates are based on index interest accounts with contract provisions that may limit the upside potential or reduce the interest earned. These accounts may not earn interest in certain situations. No income credit is applied when no interest is earned.

⁵Represents the average of the rates in the hypothetical examples shown. It is not indicative of what policy owners should expect in their own annuities and not how interest earned is calculated.

⁶Pre-activation withdrawals will reduce the Income Base and Income Credit Base in the same proportion that they reduced the contract value. Activating the GLB rider will eliminate the opportunity to double your interest earned for more income potential.

⁷If there are two covered individuals, they must be a married couple. Generally, if a change to a covered person occurs upon activation or due to a life event, at least one of the original covered persons must remain on the contract. The new covered person must have been at least 50 as of the original contract issue date and cannot be older than age 80 at the time he or she is added to the contract. Available coverage options may vary depending upon individual circumstances as of the activation date.

⁸If there are two covered persons, the age of the younger of the two covered persons is used to determine the maximum annual withdrawal percentage.

Understanding the Power Index Advisory Index Annuity and Lifetime Income Plus Multiplier Flex

Power Index Advisory is part of The Power Series of Index Annuities and a fixed index annuity (FIA) issued by American General Life Insurance Company (AGL). They are not direct investments in the stock market or any particular index. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. In exchange for your money (premium), the FIA provides you with the opportunity to earn interest based on a fixed rate or specific indices without the risk of loss of premium due to market downturns or fluctuations. When you need income, AGL promises to make regular income payments through annuitization that can last from 5 years to life or through guaranteed lifetime income under the GLB rider. Lifetime Income Plus Multiplier Flex is a feature of the Power Index Advisory Index Annuity and cannot be purchased without the index annuity.

Key Terms and Definitions

Activation of Lifetime Income Plus Multiplier Flex: The decision to begin lifetime withdrawals under the rider. Activation must be requested in writing. At the time of activation, you will have an opportunity to make changes to the number of individuals covered under Lifetime Income Multiplier Plus Flex. You can also change this coverage prior to activation under specific situations such as marriage, divorce or death. The ability to make changes is subject to certain limitations. The maximum annual withdrawal percentage is determined by the age of the covered person(s) upon activation.

Annuitization: A process that permanently converts your annuity contract to income payments. Once you annuitize the contract, you will no longer have access to your principal.

Death Benefit: The amount the beneficiary would receive upon death of the contract owner. With Lifetime Income Plus Multiplier Flex, your beneficiary will receive at least your contract value. Specifying a beneficiary can help avoid the potential costs and delays of probate.

Eligible Premium: The money used to purchase the annuity. Eligible premiums are all premiums received in the first 30 days of the contract and do not include income credits. Eligible premiums become your initial Income Base and Income Credit Base.

Excess Withdrawals: Withdrawals that exceed the Maximum Annual Withdrawal Amount (MAWA) once Lifetime Income Plus Multiplier Flex is activated. Excess withdrawals will eliminate the income credit and reduce the Income Base and Income Credit Base in the same proportion by which the contract value is reduced by the excess withdrawal. If an excess withdrawal reduces the contract value to zero, the contract and rider will terminate and you will no longer be eligible to take withdrawals or receive lifetime income payments.

Guaranteed Living Benefit (GLB) Rider: A feature that provides enhanced lifetime income for an annual fee. With a GLB rider, you retain access to your principal, even after the rider is activated and lifetime withdrawals begin.

Income Base: The value on which guaranteed withdrawals and the annual rider fee are based; it is not a part of the contract value or death benefit and cannot be withdrawn partially or in a lump sum. The Income Base is initially equal to the first eligible premium and is increased each time an eligible premium is made. It is also adjusted for withdrawals (prior to activation) and excess withdrawals (after activation). On each contract anniversary, your Income Base may increase with any available income credits.

Income Credit: An amount that may be added to your Income Base. It is not a rate of return and is not added to your contract value. It is calculated as a percentage of the Income Credit Base. The Income Credit Base and therefore the income credit are reduced proportionately for withdrawals taken prior to activation. An income credit is not available in years an excess withdrawal is taken.

Income Credit Base: A component of the rider that is used solely to calculate the income credit.

Interest Credited Rate: The rate of interest that you earn on your interest crediting options. It is adjusted for contract provisions such as index rate caps that may reduce or limit the amount of interest earned. The rate will differ each year and may be zero.

Maximum Annual Withdrawal Percentage: The maximum percentage you can withdraw each year from Lifetime Income Plus Multiplier Flex (once the rider is activated) without reducing your Income Base and Income Credit Base. Prior to beginning lifetime income, you have the option to take partial withdrawals without locking in your maximum annual withdrawal percentage, but these withdrawals will reduce the value of your Income Base, Income Credit Base and Income Credit. Please see the Owner Acknowledgment and Disclosure Statement for details.

Multiplier: A component of the rider that is used to calculate the income credit. The multiplier is 2 times the interest earned before Lifetime Income Plus Multiplier Flex is activated and 1 times the interest earned after activation.

Single and Joint Life: The number of individuals covered under the rider. This coverage is elected at the time of contract issue, but may be changed upon activating the GLB rider or under certain situations such as marriage, divorce or death. See the Owner Acknowledgment and Disclosure Statement for more information.

Spousal Continuation: Upon death of the contract owner, the spousal beneficiary has the option to continue the contract with the GLB rider benefits, as long as death occurs prior to activation. See Owner Acknowledgment and Disclosure Statement for more information.

Withdrawals: Withdrawals may be subject to federal and/or state income taxes. An additional 10% federal tax may apply if you make withdrawals or surrender your annuity before age 59½. Consult your tax advisor regarding your specific situation.
