Solving for today's retirement savings and income needs with annuities

Guarantees are backed by the claims-paying ability of the issuing insurance company.

Not FDIC or NCUA/NCUSIF Insured

May Lose Value • No Bank or Credit Union Guarantee  
Not a Deposit • Not Insured by any Federal Government Agency

When it comes to planning and preparing for retirement, the desire for protection has never been greater.

According to a recent study, 91% of investors surveyed say it is important that their retirement income plan is designed to provide a guaranteed income payment or principal protection.<sup>1</sup>

That's why more and more individuals are turning to annuities. But you may be wondering...

## What is an annuity?

Annuities are long-term insurance products designed for retirement.

In the growth stage, they can help you build assets on a tax-deferred basis.<sup>2</sup>

In the income stage, they can provide you with guaranteed income through standard or optional features. Depending on the type, an annuity can help meet your needs for growth, downside protection and protected lifetime income.

Some annuities also offer income benefits, such as Guaranteed Lifetime Withdrawal Benefits and Guaranteed Living Benefit Riders, to help you grow your retirement income and generate protected lifetime income for you—or for you and your spouse.

There are basically four different types of annuities to consider:

- 1 Fixed
- 2 Index
- 3 Variable
- 4 Income (Immediate & Deferred)

Let's take a closer look at each type of annuity—and which one may make sense for you.

**Annuity guarantees are backed by the claims-paying ability of the issuing insurance company.** There is no guarantee that income from annuities will keep pace with inflation.

<sup>1</sup> Alliance for Lifetime Income, Protected Retirement Income and Planning Study, June 2021

<sup>2</sup> Withdrawals of taxable amounts are subject to ordinary income tax and, if taken prior to age 59½, an additional 10% federal tax may apply. If you fund your IRA with an annuity, you should realize that these types of retirement accounts are already tax-deferred. An annuity provides no additional tax-deferred benefit beyond that provided by the retirement account itself. You should only use an annuity in a retirement account if you want to benefit from features other than tax deferral. Please consult with your financial professional and tax advisor regarding your individual situation.

# 1 Fixed Annuity

A fixed annuity is designed for people who are looking to save money with a guaranteed fixed rate of return for a specific period of time, protection from market risk and the option for protected lifetime income in retirement.

## How it works:

- It provides a fixed interest rate for a specific period of time, offering a high level of predictability, along with flexible payment choices including the option for lifetime income.

## Key features:

- Rate of interest is guaranteed for a specific period of time
- Protection from market downturns
- A choice of payment options, including protected lifetime income for as long as you live
- You don't have to pay taxes on any interest earned until money is withdrawn<sup>3</sup>
- Access to your funds at any time, possibly subject to charges
- May include a Guaranteed Lifetime Withdrawal Benefit (GLWB) for a fee to help grow future income

## Considerations:

- There may be withdrawal charges and an additional federal tax for early withdrawals<sup>3</sup>
- At the end of the specified time period, a new interest rate will be set and it may be higher or lower than the previous rate

**More information about annuity income benefits:** Income benefits, such as Guaranteed Lifetime Withdrawal Benefits and Guaranteed Living Benefit Riders, may be subject to additional fees, age restrictions, withdrawal parameters and other limitations may apply. With variable annuities, certain investment requirements may also apply. To realize the benefits, you'll need to take withdrawals within certain parameters. Excess withdrawals may reduce the Income Base and the amount available for future lifetime income withdrawals. Be sure to ask your financial professional for complete details about the annuity and income benefit you may be considering. As an alternative to an income benefit, an annuity contract can be annuitized in order to receive lifetime income payments for no additional cost if a lifetime annuity option is chosen.

Guarantees are backed by the claims-paying ability of the issuing insurance company.

<sup>3</sup> Earnings or interest can grow tax-deferred. Earnings or interest is taxable as income at the time of withdrawal. Withdrawals taken prior to age 59½ may be subject to an additional 10% federal tax.

## 2 Index Annuity

An index annuity is designed for people who are looking for upside growth potential (based in part on the performance of a market index), principal protection from market downturns and the option for protected lifetime income in retirement.

### How it works:

- With an Index Annuity, the interest you receive is linked, in part, to the performance of a market index, such as the Standard & Poor's 500 Index.
- When the index increases, you'll receive interest based on what's specified in your annuity contract. If the index declines, you won't receive interest, but the principal of your annuity will not be affected.

### Key features:

- The potential to grow based in part on the performance of a market index
- Protection from market downturns since the value of the annuity is not affected by negative index returns
- You don't have to pay taxes on any interest earned until money is withdrawn<sup>4</sup>
- A choice of payment options, including protected lifetime income for as long as you live
- May include a standard or optional Guaranteed Living Benefit (GLB) Rider for an additional fee to help grow future income
- Death benefit features are available

### Considerations:

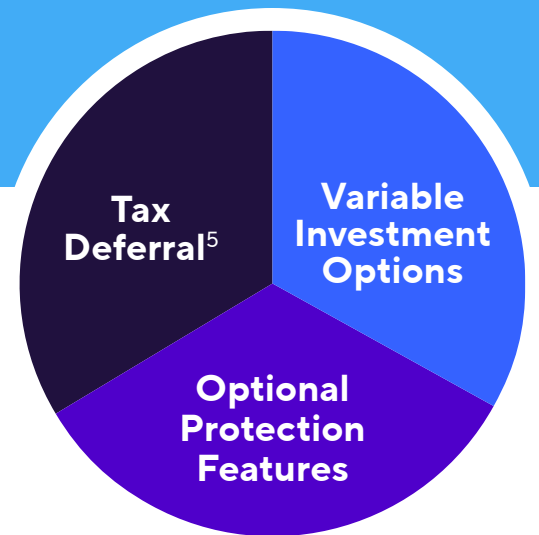

- There may be withdrawal charges and an additional federal tax for early withdrawals<sup>4</sup>
- In a down market, your annuity may not earn interest

**Additional information about index annuities:** Index annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the claims-paying ability of the issuing insurance company. They provide the potential for interest to be credited based in part on the performance of the specified index, and the principal may be protected from market downturns or fluctuations. Index annuities may not be appropriate for all clients. **Guarantees are backed by the claims-paying ability of the issuing insurance company.**

<sup>4</sup> Earnings or interest can grow tax-deferred. Earnings or interest is taxable as income at the time of withdrawal. Withdrawals taken prior to age 59½ may be subject to an additional 10% federal tax.

## 3 Variable Annuity

A variable annuity is designed for people who are looking for even greater growth potential with market participation through professionally managed investment portfolios and the option for protected lifetime income in retirement.

### How it works:

- With a variable annuity, your rate of return is tied to professionally managed investment portfolios (variable investment options) that may include stocks, bonds or a combination of investments. The value of your annuity can move up or down depending on the performance of the underlying investment portfolios selected.
- With a variable annuity, you can benefit when the investments go up, but lose money if they go down. You can, however, purchase features that help protect your income if the market goes down.

### Key features:

- Potential to benefit from market advances
- Professional money management with a choice of investment options
- You don't have to pay taxes on any interest or earnings until money is withdrawn<sup>5</sup>
- Optional Guaranteed Lifetime Withdrawal Benefit (GLWB) features may be available for an additional fee to help grow future income—no matter how the market performs<sup>6</sup>
- Standard or enhanced death benefit features may be available

### Considerations:

- You could lose some or all of your principal
- There may be withdrawal charges and an additional federal tax for early withdrawals<sup>5</sup>
- Additional fees generally apply for optional features, such as income benefits or enhanced death benefits

**Additional information about variable annuities:** An investment in a variable annuity is subject to risk, including possible loss of principal. The contract, when redeemed, may be worth more or less than the original investment. **Guarantees are backed by the claims-paying ability of the issuing insurance company.**

<sup>5</sup> Earnings or interest can grow tax-deferred. Earnings or interest is taxable as income at the time of withdrawal. Withdrawals taken prior to age 59½ may be subject to an additional 10% federal tax.

<sup>6</sup> Investment requirements may apply with variable annuity Guaranteed Lifetime Withdrawal Benefits. Depending on market performance, you may pay for the added assurance of a Guaranteed Lifetime Withdrawal Benefit but not need to rely on the feature's benefits.

## 4 Income Annuity

### Immediate Annuity or Deferred Income Annuity

An income annuity is designed for people who are looking for a predictable level of guaranteed income now or in the future, during retirement. Income annuity purchasers are more interested in maximizing their income payments.

Choice of annuity income payment options

### How it works:

- With an Income Annuity, you can begin receiving income now or in the future.
  - With an Immediate Annuity, it is typically required that income payments begin within 12 months of purchase.
  - With a Deferred Income Annuity, income payments typically begin after 12 months, but no later than 30 years after purchase.

### Key features:

- Income can begin immediately or be deferred to a later date
- A choice of annuity payment options, including protected lifetime income for as long as you live
- May provide options for payment increases
- You don't have to pay taxes on any interest or earnings until money is withdrawn<sup>7</sup>

### Considerations:

- You no longer have access to your principal
- An additional federal tax applies for early withdrawals<sup>8</sup>

**Additional information about income annuities:** Income annuities permanently convert principal into a guaranteed income stream. **Guarantees are backed by the claims-paying ability of the issuing insurance company.**

<sup>7</sup> Earnings or interest can grow tax-deferred. Earnings or interest is taxable as income at the time of withdrawal. Withdrawals taken prior to age 59½ may be subject to an additional 10% federal tax.

<sup>8</sup> With immediate annuities and deferred income annuities, a portion of each annuity payment represents a non-taxable return of premium paid for the contract (i.e., return of principal). The balance of each payment is considered ordinary taxable income. Annuity payments from an annuity held within a tax-qualified retirement account comprised of pre-tax premium/contributions will generally be fully taxable. Payments that begin prior to age 59½ may be subject to an additional 10% federal tax.

#### **Additional information about annuities**

Early withdrawals may be subject to withdrawal charges and a Market Value Adjustment (MVA) may also apply to certain fixed annuities and index annuities. Partial withdrawals may reduce benefits available under the contract, as well as the amount available upon a full surrender. Withdrawals of taxable amounts are subject to ordinary income tax and, if taken prior to age 59½, an additional 10% federal tax may apply. Keep in mind, for retirement accounts (such as IRAs), an annuity provides no additional tax-deferred benefit beyond that provided by the retirement account itself. An investment in a variable annuity involves risk, including possible loss of principal.

*Variable annuities are sold by prospectus only. The prospectus contains the investment objectives, risks, fees, charges, expenses and other information regarding the contract and underlying funds, which should be considered carefully before investing. Please contact your insurance-licensed financial professional or call 1-800-445-7862 to obtain a prospectus. Please read the prospectus carefully before investing.*

The purchase of an annuity is not required for, and is not a term of, the provision of any banking service or activity.

Annuity contracts issued by **American General Life Insurance Company** (AGL), Houston, TX except in New York, where issued by **The United States Life Insurance Company in the City of New York** (US Life). Certain annuities are issued by **The Variable Annuity Life Insurance Company** (VALIC), Houston, TX. **Variable annuities are distributed by AIG Capital Services, Inc.** (ACS), member FINRA. Issuing companies AGL, US Life and VALIC are responsible for financial obligations of insurance products. AGL does not solicit, issue or deliver policies or contracts in the state of New York. Products and services may not be available in all states and product features may vary by state. Please refer to the contract.
